Divergent thinking is employed when an individual is faced with an open-ended task (examples were given earlier—"How can a brick be used?"). From this perspective divergent thinking is a kind of problem solving. Unlike convergent thinking, where the individual gives the one correct or conventional response (e.g., "Who won the 1988 World Series?"), divergent thinking leads the ...

Divergent plate boundaries are locations where plates are moving away from one another. This occurs above rising convection currents. The rising current pushes up on the bottom of the lithosphere, lifting it and flowing laterally beneath it. This lateral flow causes the plate material above to be dragged along in the direction of flow.
