10. IMPLEMENTATION Curriculum, Instruction, Teacher Development, and Assessment. In this chapter, we consider the changes needed across the K-12 science education system so that implementation of the framework and related standards can more readily occur. Standards provide a vision for teaching and learning, but the vision cannot be realized unless the standards permeate the education system ...

More recently, urbanisation has significantly altered ecosystems (Cross-Chapter Box 4 in Chapter 2). Since around 1850, about 35% of human-caused CO₂ emissions to the atmosphere has come from land as a combined effect of land degradation and land-use change (Foley et al. 2005 14) and about 38% of the Earth's land area has been converted to agriculture (Foley et al. 2011 15).

Language development no longer even figures into contemporary diagnostic criteria, although early delays in language often lead to parents' concerns. In this chapter, we review recent empirical research on language development in autism. To paint a contemporary picture, we restrict our review to studies published in the twenty-first century.

This chapter addresses the important question of why young people begin to use tobacco. The immediate and long-term health consequences of use have been extensively documented over the past 50 years. Why anyone would begin to smoke or use smokeless products may therefore not seem "rational." This chapter (and Chapter 5, "The Tobacco Industry's Influences on the Use of Tobacco Among ...

Water Filtration. Water filtration is the process of removing or reducing the concentration of particulate matter, including suspended particles, parasites, bacteria, algae, viruses, and fungi, as well as other undesirable chemical and biological contaminants from contaminated water to produce safe and clean water for a specific purpose, such as drinking, medical, and pharmaceutical applications.
