The Faccin facility. A specialist in the design, manufacturing and sale of plate rolling machines, bending rolls, profile bending machines, dished head machinery and special machines including ship frame benders, hydraulic presses and plate straightening machines, Faccin concentrates its production in Visano, in the Brescia province. The Faccin facility covers over an area of 60,000 m² ...

[Metal Rolling Machine - Plate Rolling Machine - Faccin](#)

In metalworking, rolling is a metal forming process in which metal stock is passed through one or more pairs of rolls to reduce the thickness, to make the thickness uniform, and/or to impart a desired mechanical property. The concept is similar to the rolling of dough. Rolling is classified according to the temperature of the metal rolled. If the temperature of

Plate design. The backing plate is a standard part, which has a round backing plate (JB / T7643.6-2008) and a rectangular backing plate (JB / T7643.6-2008). Selection basis is the shape and size of the die. The plane size of the backing plate is the same as that of the die, and the thickness is generally 5-12mm.
