The laboratory rat (*Rattus norvegicus*) has long been favored as an experimental model for nutritional research because of its moderate size, profligate reproduction, adaptability to diverse diets, and tractable nature. It is now the species of choice for many experimental objectives because of the large body of available data and the development of strains with specific characteristics that ...

The Mohr–Coulomb criterion is defined by the following equation (4) $\tau = c + \sigma \tan \phi$ where τ is the normal stress (negative in compression in ABAQUS convention), σ the shear stress, c the cohesion and ϕ the angle of friction of the material. The Mohr–Coulomb yield-limit expression in terms of the stress invariants is given in ...

These equations are then identical in form with the complex-stress eqns. (13.8) and (13.9) † with I_{xx} , I_{yy} , and I_{xy} replacing σ_x , σ_y and τ_{xy} and Mohr's circle can be drawn to represent f values in exactly the same way as Mohr's stress circle represents stress values.

A star is an astronomical object consisting of a luminous spheroid of plasma held together by its own gravity.The nearest star to Earth is the Sun.Many other stars are visible to the naked eye at night, but due to their immense distance from Earth they appear as fixed points of light in the sky. The most prominent stars are grouped into constellations and asterisms, and many of the brightest ...
