A CD player is an electronic device that plays audio compact discs, which are a digital optical disc data storage format. CD players were first sold to consumers in 1982. CDs typically contain recordings of audio material such as music or audiobooks. CD players may be part of home stereo systems, car audio systems, personal computers, or portable CD players such as CD boomboxes.

Answer (1 of 13): Almost always. Only a few early model DVD players didn't include the laser required for compatibility with CD playback. You'll usually see a CD logo on the case, but CD compatibility is basically a given these days. Early players might have trouble with CD-R or CD-RW home-burned...
